JOURNAL OF ELECTRON SPECTROSCOPY AND RELATED PHENOMENA

VOLUME 50 (1990)

Subject Index

Aluminum–silver excitation source
Auger parameters for sulfur-containing compounds using a mixed aluminum–silver excitation source, 159
Angle-resolved photoemission spectroscopy
Resolution enhancement of angle-resolved photoemission spectrum (ARPES) by the modified FIRO method, 77
Antimony
X-ray and electron-energy-loss spectra of Bi, Sb, Te and Bi_2Te_3, Sb_2Te_3 chalcogenides, 171
Argon
Synchrotron radiation photoemission and X-ray photoelectron spectroscopy studies of argon ion etched SiO_2 surfaces, 47
Auger electron spectroscopy
STM and AES study of the relation between ion sputter induced roughness and depth resolution, c9
Study of the chemical bonding of titanium with silicon and oxygen by AES and SEELS, 185
Auger parameter
Relationship between the Auger parameter and the energy gap, 289
Auger parameters for sulfur-containing compounds using a mixed aluminum–silver excitation source, 159

Binding energy
Comments on the use of implanted Ar as a binding energy reference, c15
Bismuth
X-ray and electron-energy-loss spectra of Bi, Sb, Te and Bi_2Te_3, Sb_2Te_3 chalcogenides, 171
Bulk quantitative analysis
New method for bulk quantitative analysis by ESCA, 31

Carbides
Note on the formation of surface carbides, 277
Carbonyl complexes
The mapping of charges in carbonyl complexes of some transition elements from XPS data, 267
Carbyne
Electronic structure of carbyne studied by X-ray photoelectron spectroscopy and X-ray emission spectroscopy, 295
Chalcogenides
X-ray and electron-energy-loss spectra of Bi, Sb, Te and Bi_2Te_3, Sb_2Te_3 chalcogenides, 171
Channel electron multipliers
Channel electron multipliers: quantitative intensity measurement – efficiency, gain, linearity and bias effects, 137
Charging effect
Pressure dependence of the charging effect in monochromatized small spot X-ray photoelectron spectroscopy, 19
Core electron binding energy
A relation between the atomic charge of carbon and the C1*s* core electron binding energy estimated from a comparison of gas phase and solid state data and the molar polarizabilities of the investigated molecules, 251
Non-linear relationship between carbon core-level electron binding energies and Mulliken charge on the carbon atoms, 129

Depth profile analysis
Application of spectrum synthesis method to depth profile analysis, 53
Depth resolution
STM and AES study of the relation between ion sputter induced roughness and depth resolution, c9

Electron energy loss spectroscopy
Quantitative electron energy loss spec-

troscopy on *M*45 edges in rare earth oxides, 1
X-ray and electron-energy-loss spectra of Bi, Sb, Te and Bi_2Te_3, Sb_2Te_3 chalcogenides, 171
Electron impact excitation
Electron spectroscopy observation of the $1s2s^22p6$ (2*S*) state in atomic fluorine by means of electron impact excitation of the HF molecule, *c*1
Energy gap
Relationship between the Auger parameter and the energy gap, 289
Energy loss
Energy loss rate and inelastic mean free path of low-energy electrons and positrons in condensed matter, 323
ESCA
New method for bulk quantitative analysis by ESCA, 31
Escape depths
Calculation of escape depths from inelastic mean free paths, 109

Fano-like resonance
4p–4d Fano-like resonance in rhodium, 195
FIRO method
Resolution enhancement of angle-resolved photoemission spectrum (ARPES) by the modified FIRO method, 77
Fluorine
Electron spectroscopy observation of the $1s2s^22p6$ (2*S*) state in atomic fluorine by means of electron impact excitation of the HF molecule, *c*1

HF
Electron spectroscopy observation of the $1s2s^22p6$ (2*S*) state in atomic fluorine by means of electron impact excitation of the HF molecule, *c*1
High-T_c superconductive oxides
Correlation effects in photoelectron spectra of high-T_c superconductive oxides: the hole-induced redistribution of Cu3*d* states in La_2CuO_4, 213
Hydrides
Photoionization of the first- and second-row atom hydrides using synchrotron radiation: measurements for the outer- and inner-valence shells, 219

Implanted Ar
Comments on the use of implanted Ar as a binding energy reference, *c*15
Inelastic mean free path
Calculation of escape depths from inelastic mean free paths, 109
Energy loss rate and inelastic mean free path of low-energy electrons and positrons in condensed matter, 323
Ion sputtering
STM and AES study of the relation between ion sputter induced roughness and depth resolution, *c*9
Ionization band profile analysis
Ionization band profile analysis in valence photoelectron spectroscopy, 335
Iron(II)hydroxide
Mössbauer spectra at 77 K of products formed during transformation of iron(II)hydroxide containing zinc(II) ion to Zn-bearing ferrite in aqueous suspension by air oxidation, 309

La_2CuO_4
Correlation effects in photoelectron spectra of high-T_c superconductive oxides: the hole-induced redistribution of Cu3*d* states in La_2CuO_4, 213

Merocyanine dyes
X-ray photoelectron spectroscopy of merocyanine dyes. Part VIII., *c*25
Mössbauer spectroscopy
Mössbauer spectra at 77 K of products formed during transformation of iron(II) hydroxide containing zinc(II) ion to Zn-bearing ferrite in aqueous suspension by air oxidation, 309
Mulliken charge
Non-linear relationship between carbon core-level electron binding energies and Mulliken charge on the carbon atoms, 129

Nickel dithiolenes
A UV photoelectron spectroscopy and X_α approach to the electronic structure of nickel dithiolenes, 201
Nickel oxide
Reversible temperature dependence of the surface defect structure of nickel oxide at

an oxygen pressure of 10^{-3}Pa studied by X-ray photoelectron spectroscopy, 61

Oxygen
Study of the chemical bonding of titanium with silicon and oxygen by AES and SEELS, 185

PF_5
Theoretical investigation of the F1*s* line in X-ray photoelectron spectra of PF_5 and XeF_6 molecules, 103
Photoelectron spectroscopy
Correlation effects in photoelectron spectra of high-T_c superconductive oxides: the hole-induced redistribution of Cu3*d* states in La_2CuO_4, 213
Photoemission spectroscopy
Volume plasmon losses in Si2*p* photoemission spectra for photon energies up to 1600 eV, 353
Photoionization
Photoionization of the first- and second-row atom hydrides using synchrotron radiation: measurements for the outer- and inner-valence shells, 219
Platinum clusters
Anomalous oxidation of platinum clusters studied by X-ray photoelectron spectroscopy, 39
Plutonium hydride
Detection of plutonium hydride using X-ray photoelectron spectroscopy, 67
Positrons
Energy loss rate and inelastic mean free path of low-energy electrons and positrons in condensed matter, 323

Resonant selective vibrational excitation
Symmetry selection rules vs. vibronic coupling in resonant selective vibrational excitation of polyatomic molecules by electron impact, 117
Reversible temperature dependence
Reversible temperature dependence of the surface defect structure of nickel oxide at an oxygen pressure of 10^{-3}Pa studied by X-ray photoelectron spectroscopy, 61
Rhodium
4*p*–4*d* Fano-like resonance in rhodium, 195

Scanning tunneling microscopy
STM and AES study of the relation between ion sputter induced roughness and depth resolution, *c*9
Silicon
Study of the chemical bonding of titanium with silicon and oxygen by AES and SEELS, 185
Slow electron energy loss spectroscopy
Study of the chemical bonding of titanium with silicon and oxygen by AES and SEELS, 185
Smoothing
Smoothing by spline functions: applications in electron spectroscopy, *c*19
SO_2
An XPS study of SO_2 on a CaO surface derived from $Ca(OH)_2$, 229
Spectrum synthesis method
Application of spectrum synthesis method to depth profile analysis, 53
Spline functions
Smoothing by spline functions: applications in electron spectroscopy, *c*19
Sulfur-containing compounds
Auger parameters for sulfur-containing compounds using a mixed aluminum–silver excitation source, 159
Surface roughness
STM and AES study of the relation between ion sputter induced roughness and depth resolution, *c*9
Synchrotron radiation
Photoionization of the first- and second-row atom hydrides using synchrotron radiation: measurements for the outer- and inner-valence shells, 219
Synchrotron radiation photoemission
Synchrotron radiation photoemission and X-ray photoelectron spectroscopy studies of argon ion etched SiO_2 surfaces, 47

Tellurium
X-ray and electron-energy-loss spectra of Bi, Sb, Te and Bi_2Te_3, Sb_2Te_3 chalcogenides, 171
Titanium
Study of the chemical bonding of titanium with silicon and oxygen by AES and SEELS, 185

UV photoelectron spectroscopy
A UV photoelectron spectroscopy and X_α approach to the electronic structure of nickel dithiolenes, 201

Valence photoelectron spectroscopy
Ionization band profile analysis in valence photoelectron spectroscopy, 335
Vibronic coupling
Symmetry selection rules vs. vibronic coupling in resonant selective vibrational excitation of polyatomic molecules by electron impact, 117
Volume plasmon losses
Volume plasmon losses in Si2*p* photoemission spectra for photon energies up to 1600 eV, 353

X-ray emission spectroscopy
Electronic structure of carbyne studied by X-ray photoelectron spectroscopy and X-ray emission spectroscopy, 295
X-ray photoelectron spectroscopy
An XPS study of SO_2 on a CaO surface derived from $Ca(OH)_2$, 229
Anomalous oxidation of platinum clusters studied by X-ray photoelectron spectroscopy, 39
Detection of plutonium hydride using X-ray photoelectron spectroscopy, 67
Electronic structure of carbyne studied by X-ray photoelectron spectroscopy and X-ray emission spectroscopy, 295
Pressure dependence of the charging effect in monochromatized small spot X-ray photoelectron spectroscopy, 19
Reversible temperature dependence of the surface defect structure of nickel oxide at an oxygen pressure of 10^{-3}Pa studied by X-ray photoelectron spectroscopy, 61
Synchrotron radiation photoemission and X-ray photoelectron spectroscopy studies of argon ion etched SiO_2 surfaces, 47
The mapping of charges in carbonyl complexes of some transition elements from XPS data, 267
Theoretical investigation of the F1*s* line in X-ray photoelectron spectra of PF_5 and XeF_6 molecules, 103
XPS core level spectra of some Y compounds, 167
X-ray and electron-energy-loss spectra of Bi, Sb, Te and Bi_2Te_3, Sb_2Te_3 chalcogenides, 171
X-ray photoelectron spectroscopy studies on solid xanthates, 239
X-ray photoelectron spectroscopy of merocyanine dyes. Part VIII., *c*25
Xanthates
X-ray photoelectron spectroscopy studies on solid xanthates, 239
XeF_6
Theoretical investigation of the F1*s* line in X-ray photoelectron spectra of PF_5 and XeF_6 molecules, 103

Yttrium
XPS core level spectra of some Y compounds, 167

Zinc
Mössbauer spectra at 77 K of products formed during transformation of iron(II) hydroxide containing zinc(II) ion to Zn-bearing ferrite in aqueous suspension by air oxidation, 309
